

PPP CONTRACT FOR DEVELOPMENT OF SITAKUNDA-CHITTAGONG-COX'S BAZAR MARINE DRIVE EXPRESSWAY

Introduction

Join us on the path to innovation with the Marine Drive Expressway project in Bangladesh. This ambitious public-private partnership aims to revolutionize transportation infrastructure, significantly shorten travel times, and spur economic growth across the region. This document outlines the transformative potential of the project, featuring comprehensive insights into its design, stakeholder viewpoints, and environmental impact considerations.

Key Features

The Marine Drive Expressway is set to become the longest marine drive in the world, stretching an impressive 170 km from Mirsarai to Cox's Bazar. Designed as a dual four-lane carriageway, this route will enhance connectivity by reducing travel times between Cox's Bazar and Chattogram from over three hours to just two. The expressway will feature modern safety protocols and is expected to handle significant vehicular traffic, boosting accessibility to key tourist and economic zones.

Project Benefits and Strategic Impact

The Marine Drive Expressway project is strategically positioned to be a cornerstone of Bangladesh's infrastructure development, driving substantial economic and social benefits:

- **Economic Growth:** By connecting major economic hubs, the expressway will facilitate smoother trade flows, attract investment, and promote the development of adjacent areas.
- **Tourism Enhancement:** The expressway will open up new tourist destinations along its route, significantly boosting local tourism and related industries.
- **Community Development:** With the creation of jobs and improvement in local infrastructure, communities along the expressway will see enhanced living standards and economic opportunities.
- **Environmental Sustainability:** Planned with an eye towards sustainability, the expressway aims to incorporate green building standards and technologies to minimize its ecological footprint.

Environmental Impact Assessment

The environmental foresight for the Marine Drive Expressway has been thoroughly assessed by CDR International in collaboration with Dev Consultant. The preliminary findings highlight potential positive impacts like enhanced flood safety and job creation, alongside concerns such as possible dislocations and ecological disturbances. Strategic planning and rigorous environmental management practices are proposed to mitigate negative impacts and ensure the project's

Conclusion

As we conclude, the Marine Drive Expressway stands as a beacon of progress and connectivity, poised to significantly contribute to Bangladesh's economic and social landscape. This project is not just an infrastructure development; it's a leap towards a prosperous future. We invite you to join us in this monumental journey, as we gear up to witness and contribute to the growth and success that the Marine Drive Expressway will undoubtedly bring to Bangladesh.
